PROFESSIONAL SUMMARY

Software developer and IT professional with 4+ years of experience in technical support, systems administration, and network management, building toward a career in application development and cloud security through a Master's in Information Systems Technology at GWU. Hands-on project experience in Python, SQL, machine learning, and web development, backed by a proven track record of improving system reliability and delivering measurable results.

EDUCATION

The George Washington University, School of Business

Washington, DC

Master of Science, Information Systems Technology — Expected December 2026

- Relevant Coursework: Python and Database Applications, Relational Database, Information System Security

University of Ghana

Ghana

Bachelor of Arts, Information Studies & Psychology — November 2016

- Relevant Coursework: Information Management, Introduction to Computing

EXPERIENCE

IT Assistant

May 2022 – October 2024

Oraimo

- Onboarded 100+ customers through account setup and device configuration, ensuring optimal functionality.
- Resolved hardware, software, and network issues through targeted technical support, achieving a 50% reduction in system downtime as tracked via Google and Meta analytics.
- Diagnosed and implemented solutions for device issues, driving an 89% increase in customer satisfaction.
- Trained 7 new team members on device setup procedures, customer service protocols, and internal support systems.
- Managed inventory and order operations, tracking stock levels and processing returns/exchanges for 50+ orders daily while reconciling counts to maintain accurate fulfillment.

IT Support Technician

December 2018 – September 2020

National Identification Authority, Ghana

- Monitored and verified registration systems daily, reducing downtime by 15%.
- Troubleshoot registration systems to resolve performance issues, connectivity failures, and security vulnerabilities, resulting in a 50% increase in productivity and improved system reliability.
- Collaborated with the IT team remotely and on-site to deploy weekly updates and security patches for registration systems.
- Trained 20+ new staff on registration and data entry procedures, cutting errors by 35% and improving team efficiency.

PROJECTS

IoT Network Energy Optimization Pipeline

PySpark, Databricks, Keras, SMOTE, Plotly

- Designed a Bronze/Silver/Gold medallion-architecture ML pipeline on IoT energy-management data; engineered features, balanced classes with SMOTE, and benchmarked a Keras neural network against Logistic Regression, Random Forest, Gradient Boosting, and SVM baselines, reaching 99%+ accuracy and F1-score.

SpotEase (GW SpotFinder)

HTML, CSS, JavaScript, Bootstrap

- Built a client-side web app for GW students to find and filter study spaces, with dynamic post/review features and campus alerts.

DB-CRUD-Actions

Python, SQL

- Developed a database application implementing full CRUD operations for reliable, structured data management.

Movie & Show Finder API

Python, REST APIs

- Built a Python application integrating a third-party REST API to search and retrieve movie and TV show data.

SKILLS

Software & Data: Python (API Development, Automation), SQL & Relational Databases, Machine Learning (scikit-learn, Keras), Git & GitHub, HTML, CSS, JavaScript, Bootstrap, CI/CD Fundamentals

Systems & Security: Systems Administration & Troubleshooting, Network Management, Cloud Security & DevSecOps Fundamentals, Cybersecurity Fundamentals, Security Patch Management, IT Documentation
